Gr. II (UE)

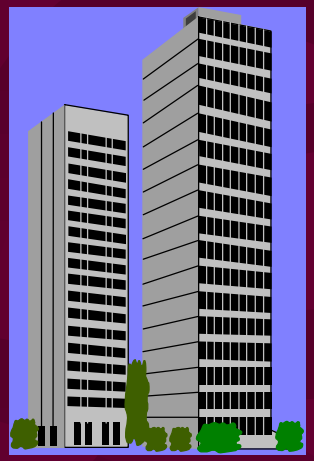
Financial Applications

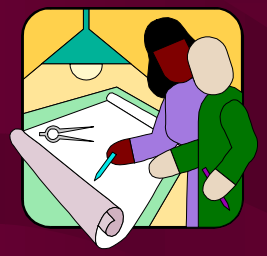
- Integration with the logistic modules
  - Purchase Orders
  - Sales Orders
  - Inventory transactions
- Drill Down to transactions
- Security & Authorizations
- Multi Comp setup (Multi-Site)
- Forei

e.g. In ACP, the price difference approval can be defined by percentage or amount for each user

Gr. II (UE)

Concept-BaaN Company





A BaaN Company consists of a set of data tables that are used by all users related to that entity.

Concepts... Multi-Company

Gr. II (UE)

- The tables in a BaaN Company can be broadly categorized into Logistics tables like:
- Item
- BOM
- Routing etc.

and Financial tables like:

- Currency
- Chart of Accounts
- Periods
- Transaction types etc.

Concepts... Multi-Company

Gr. II (UE)

- A BaaN company can be categorized into:
- Logistic company
- Financial Company
- Logistic and Financial Company

Concepts... Multi-Company

Gr. II (UE)

Logistic company:

- A company that has its own logistics tables but refers to another company for financial data.
- Logistics functions include purchase, sales, planning, warehousing & inventory control. Hence, all transaction pertaining to these functions shall be referred as Logistic transaction viz. PO preparation.

BaaN Company

Concepts... Multi-Company - Models

Gr. II (UE)

Financial company:

- A company that has its own financial tables but refers to another company for logistics data.
- Financial functions include General Ledger, Accounts Payable, Accounts Receivable, Cash Management. Hence, all transaction pertaining to these functions shall be referred as Financial Transaction. Viz. Supplier payments.

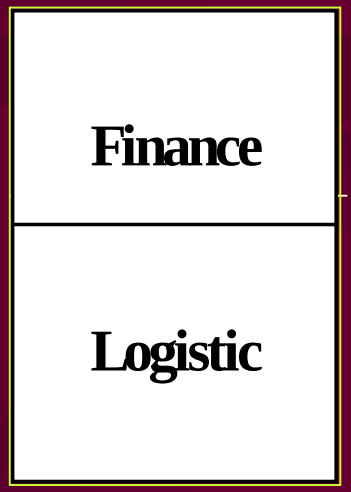
BaaN Company

Concepts... Multi-Company

Gr. II (UE)

Logistics and Financial Company:

- A company that has both logistics as well as financial tables of its own.



BaaN Company

Concepts...

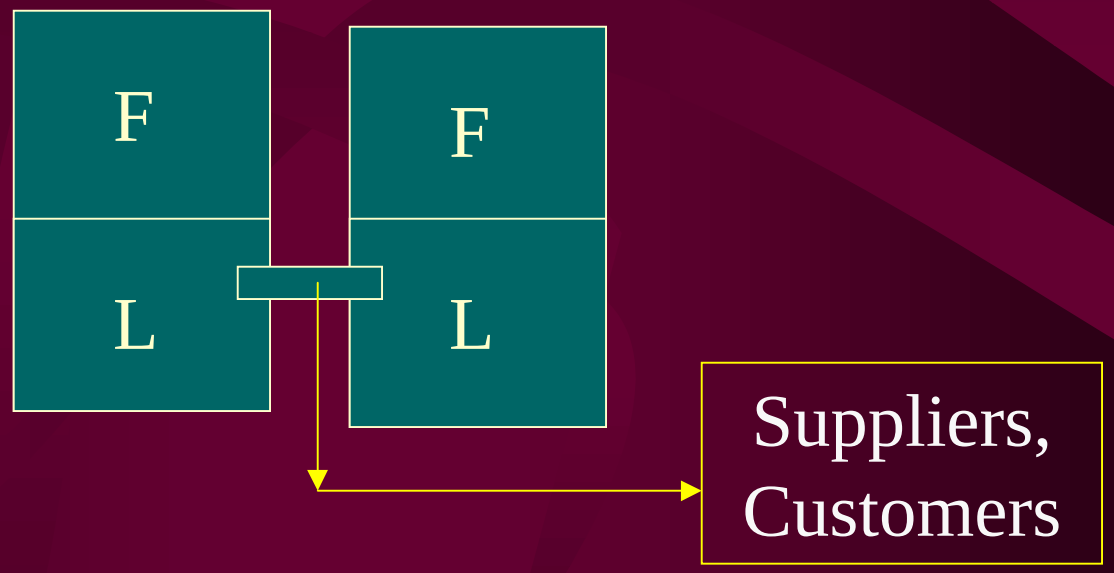
Group Company

- It is possible to bring together different companies (both logistic and finance) into a single group. One out of these companies can be designated as the "Group Company", which contains all logistics and financial tables of its own.

Concepts...

Gr. II (UE)

- **Sharing of Tables** - Though each company has its own independent data, it is possible to group data across different companies onto a single data table, referred by all companies in the group.



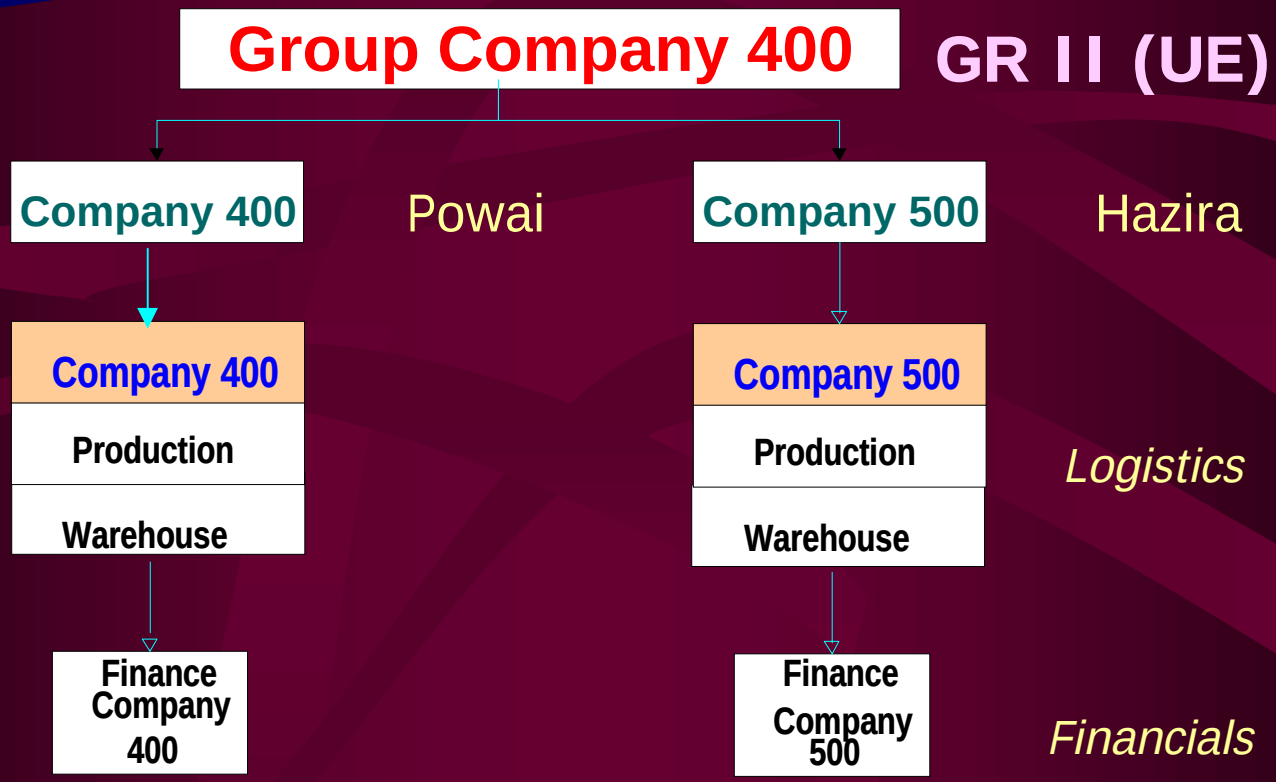
Concepts...

BaaN provides Multi-company transactions in Finance only

- Financial transactions can be effected across companies
- Financial consolidation facilitated

Gr. II (UE)

BaaN Setup for UE



SBU-I,II, III, IV, V and services will be distinct dimensions

SBU-I,II, III, IV, V and services will be distinct dimensions

Gr. II (UE)

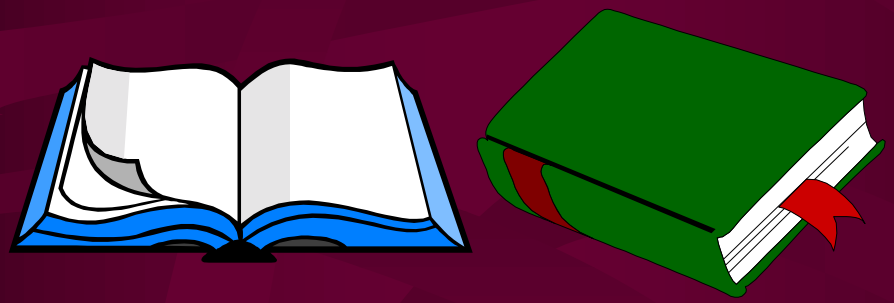
Features of the Setup

- One company w
  for each locat
  Hazira.
- Within eac
  SBU transactions will be accounted in a distinct dimension.
- Document Series is one of the key elements for distinguishing SBU specific transactions.

E.g P.O series will be “01” for SBU-1, “02” for SBU-2 etc.

Gr. II (UE)

General Ledger



Gr. II (UE)

GeneralLedger

- Financial Multi Company Structure (PEW & HZW as separate companies)
- Parent-Child Relation
- Authorities on Different Levels
- Drill Down on Financial Information

Gr. II (UE)

Using GeneralLedger

- Includes master setup
  - Ledger Accounts
  - Dimensions
  - Periods
  - Transactions types
- Financial accounting
- Periodic & Year end processing
- Setting up integration accounting schema

Gr. II (UE)

General Ledger Foundation

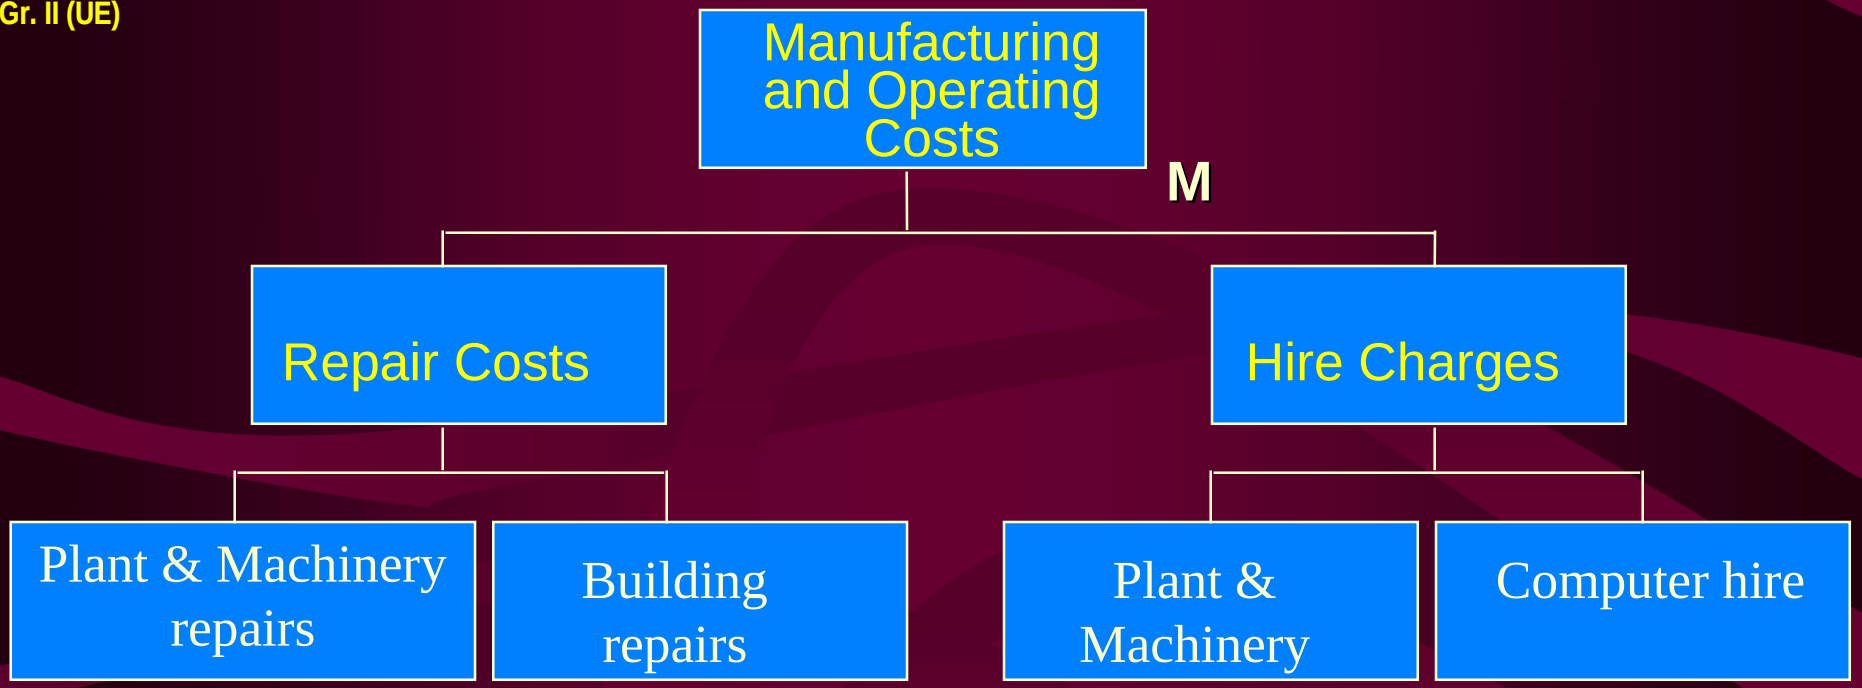
- Ledger account are of four types: Balance Sheet, P&L, Inter-company, Text
- Amounts and two quantities
- Sub levels and print sequence for trial balance
- Blocking possibilities
- Period Types are
  - Fiscal, Reporting, Tax
- Financial Data are processed periodwise

Structure-Chart of Accounts

Gr. II (UE)

Gr. II (UE)

Structure - Chart of Accounts



Machine Shop

Design & Engg. Dept.

Project 20001

Project 45001

Gr. II (UE)

Dimensions

- Every transaction is recorded in a ledger account, which has a parent-child relationship
- Further details required to be captured
  - Cost Centre
  - Project code
  - SBU
  - Employee code

which are dimensions in BaaN. The dimensions are used for further analysis.

Gr. II (UE)

Dimension Foundation

- Dimension types will be cost centre, project code, SBU, Employee code
- No interrelationship between dimension types
- Free definable dimension codes
- Parent child relationships within a dimension type
- Dimension ranges per Ledger account
- Amounts and two quantities
- Blocking possibilities

Gr. II (UE)

How to Use Dimensions

Adding Dimension codes to Ledger Accounts

- Activating the Dimension type for a Ledger Account
- Valid for Selected Range
- Alphanumeric Code (6 Characters)
- Automatically for Integrated Transactions

Gr. II (UE)

Transaction Foundation

- Transaction types are groups of financial transaction. Used for recording and processing purchase / sales invoi
- User definable CSH (Cash), PUR (dvice), MOD (Modva
- Series for docu
- Checksums
- Several transaction type categories
- Transaction schemes can be defined

What does this equate to in SunSystems?

Journal Definitions

Gr. II (UE)

Transaction Categories

- Journal
- Recurring/reversing
- Sales invoices, credit notes, adjustments
- Purchase invoices, credit notes, adjustments
- Opening balance
- Cash (all payment/receipt transactions)

Gr. II (UE)

Transaction Processing

- Update Options
  - Real time
  - End of sessi
  - Finalization
- Entry of recurr
- Creation of tra

Transactions are updated after the session in which transactions are entered is quit

Tra ions that recur regularly in each of the period e.g rent payments or periodic provision entries

tfgld0111m000 : Maintain Transaction Types [102]

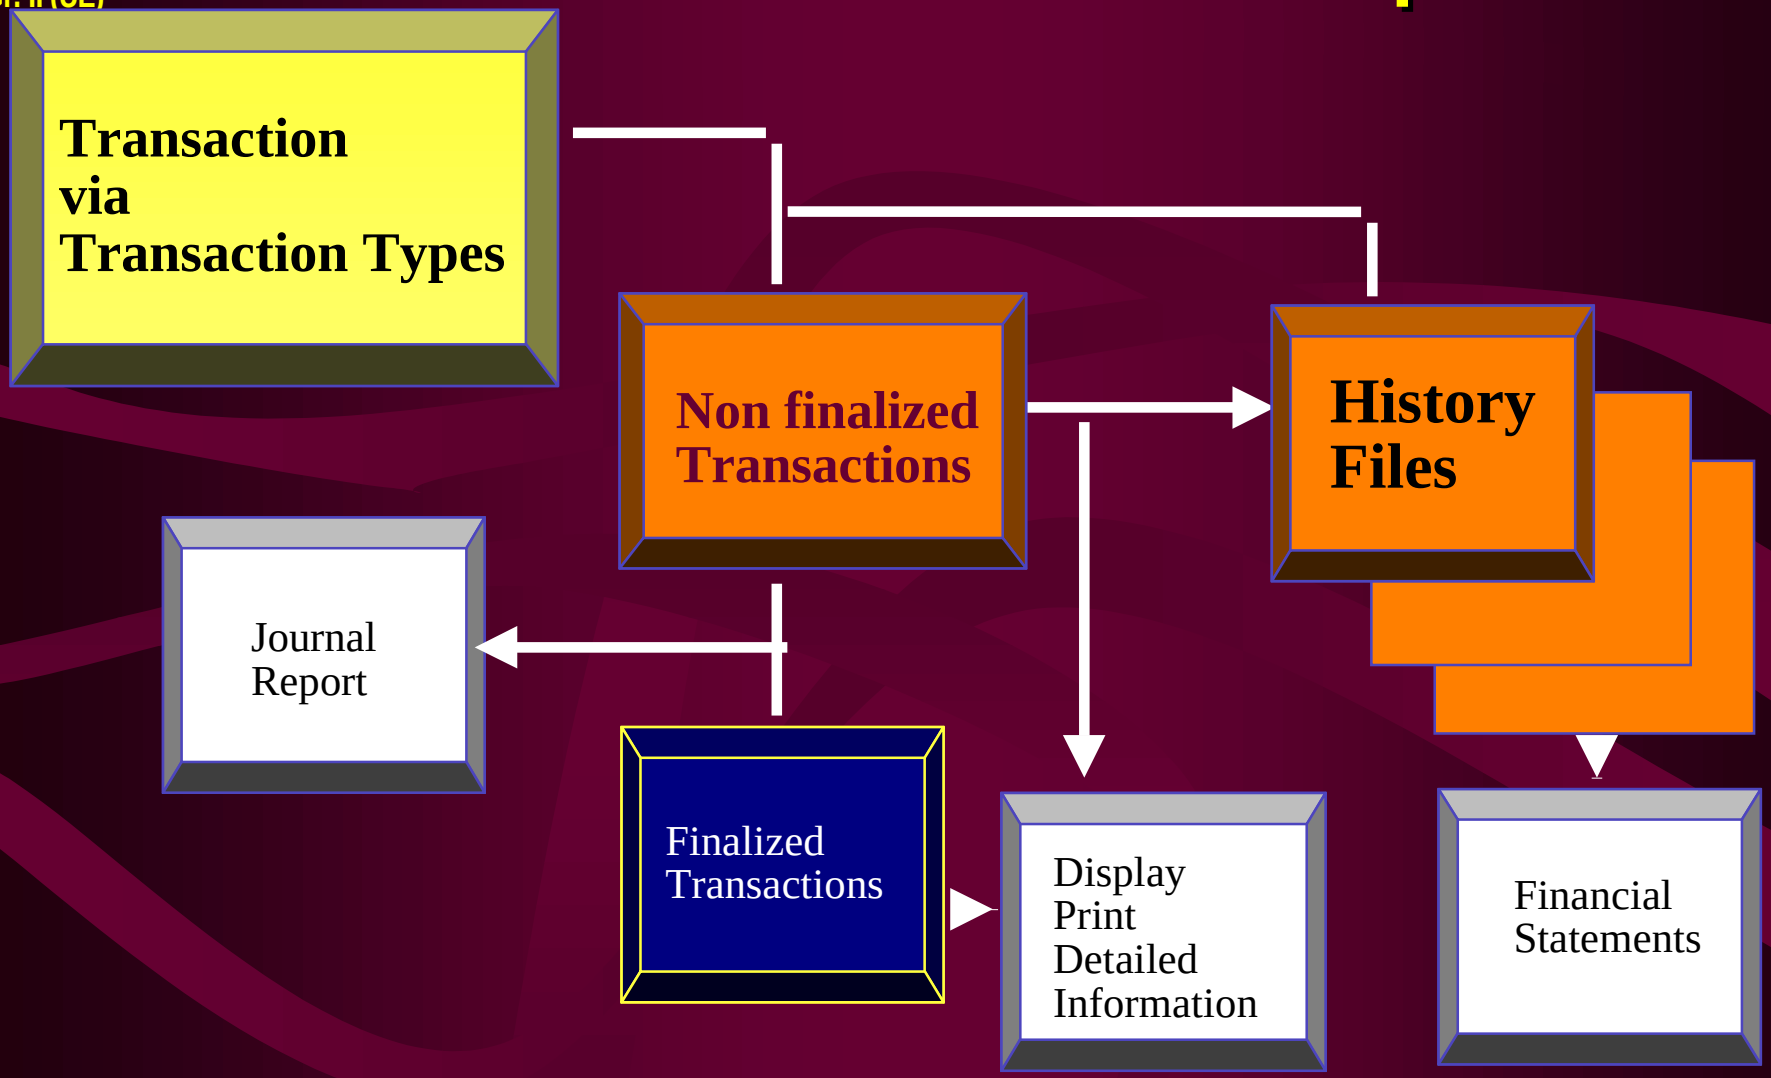
Gr. II (UE)

Transaction Update



Gr. II (UE)

Periodic Processing

- Financial Data are processed period-wise.
- Period Status to be “Open” before financial transactions can be processed.
- Periods can be closed for specific module - ACP, ACR, CMG & GLD.
- Each period can be closed provisionally and later on closed finally.

Gr. II (UE)

Accounts Receivable

Gr. II (UE)

Accounts Receivable Foundation

- Financial customer groups define the link for customer transactions to the General Ledger e.g Exports, Intergroup, Project Customers (Intra) etc.
- User definable problem codes to exclude invoices from reminding
- Flexible periods for aging analysis

Includes control account for the customer, advance account, Currency gain / loss account

Gr. II (UE)

Accounts Receivable

- Integration with Sales Module
- Credit Management
  - On line credit management
  - Aging analysis
  - Customer statement of accounts
  - Flexible reminder methods
- Interest Invoices can also be generated

Gr. II (UE)

Accounts Payable

Gr. II (UE)

Accounts Payable Foundation

- Financial supplier groups for link to GL
- Blocking code defined to exclude invoice from payment
- Flexible periods for aging analysis
- Define tolerances for minor price differences between invoices and orders

Gr. II (UE)

Purchase Invoice Control

- Immediate registration of incoming invoices
- Tracking & Authorization of incoming invoices
- Entry of order-based and sundry invoices
- Linking of credit notes and update of balances
- Automatic matching of invoices with goods receipt
- Separate procedure for approval of invoices that exceeded the user tolerances
- Transaction schedules can be attached to invoice

Gr. II (UE)

Cash Management

Cash Management

- Supplier Payments
- Customer Receipts
- Creation of standing orders (Payment without invoice as rent etc.)
- Bank Reconciliation

Cash Management

- Bank Relations define the bank account details in BaaN
- Payment Methods determine how payable invoices will be paid or how customer dues will be settled e.g. Cheques, Demand Draft etc.
- Cheque number Master defined for each bank account
- Cheque status also captured

Gr. II (UE)

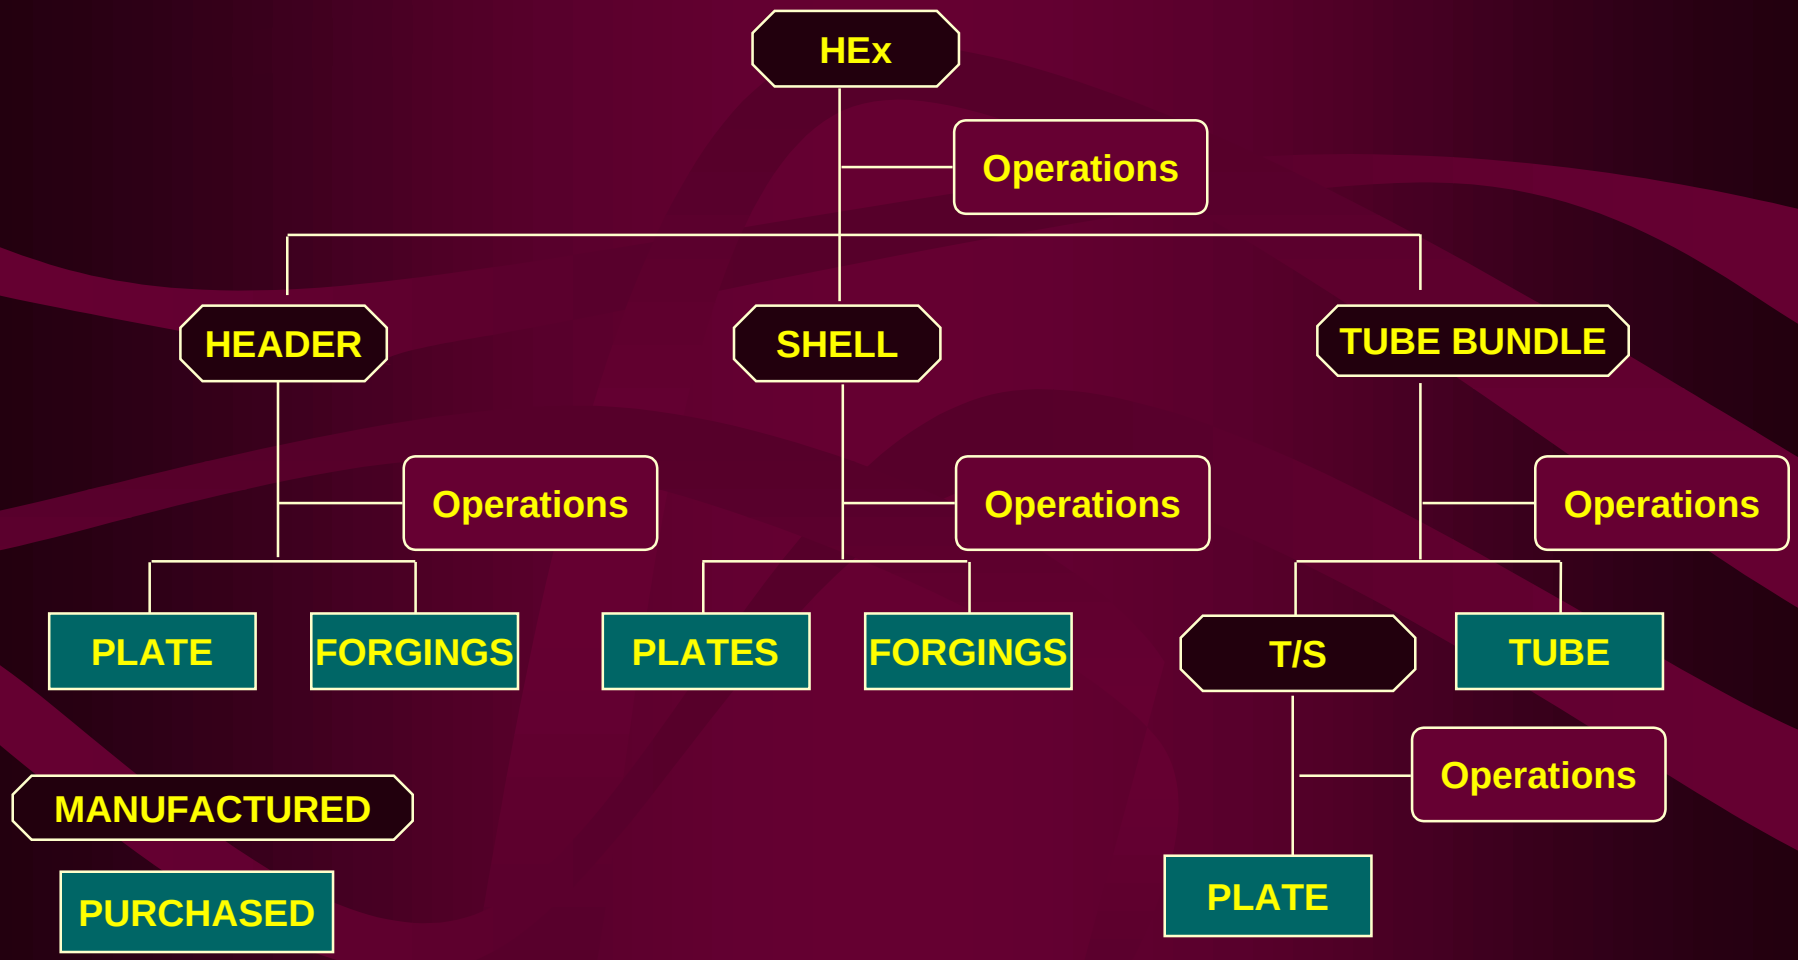
Job Costing

Gr. II (UE)

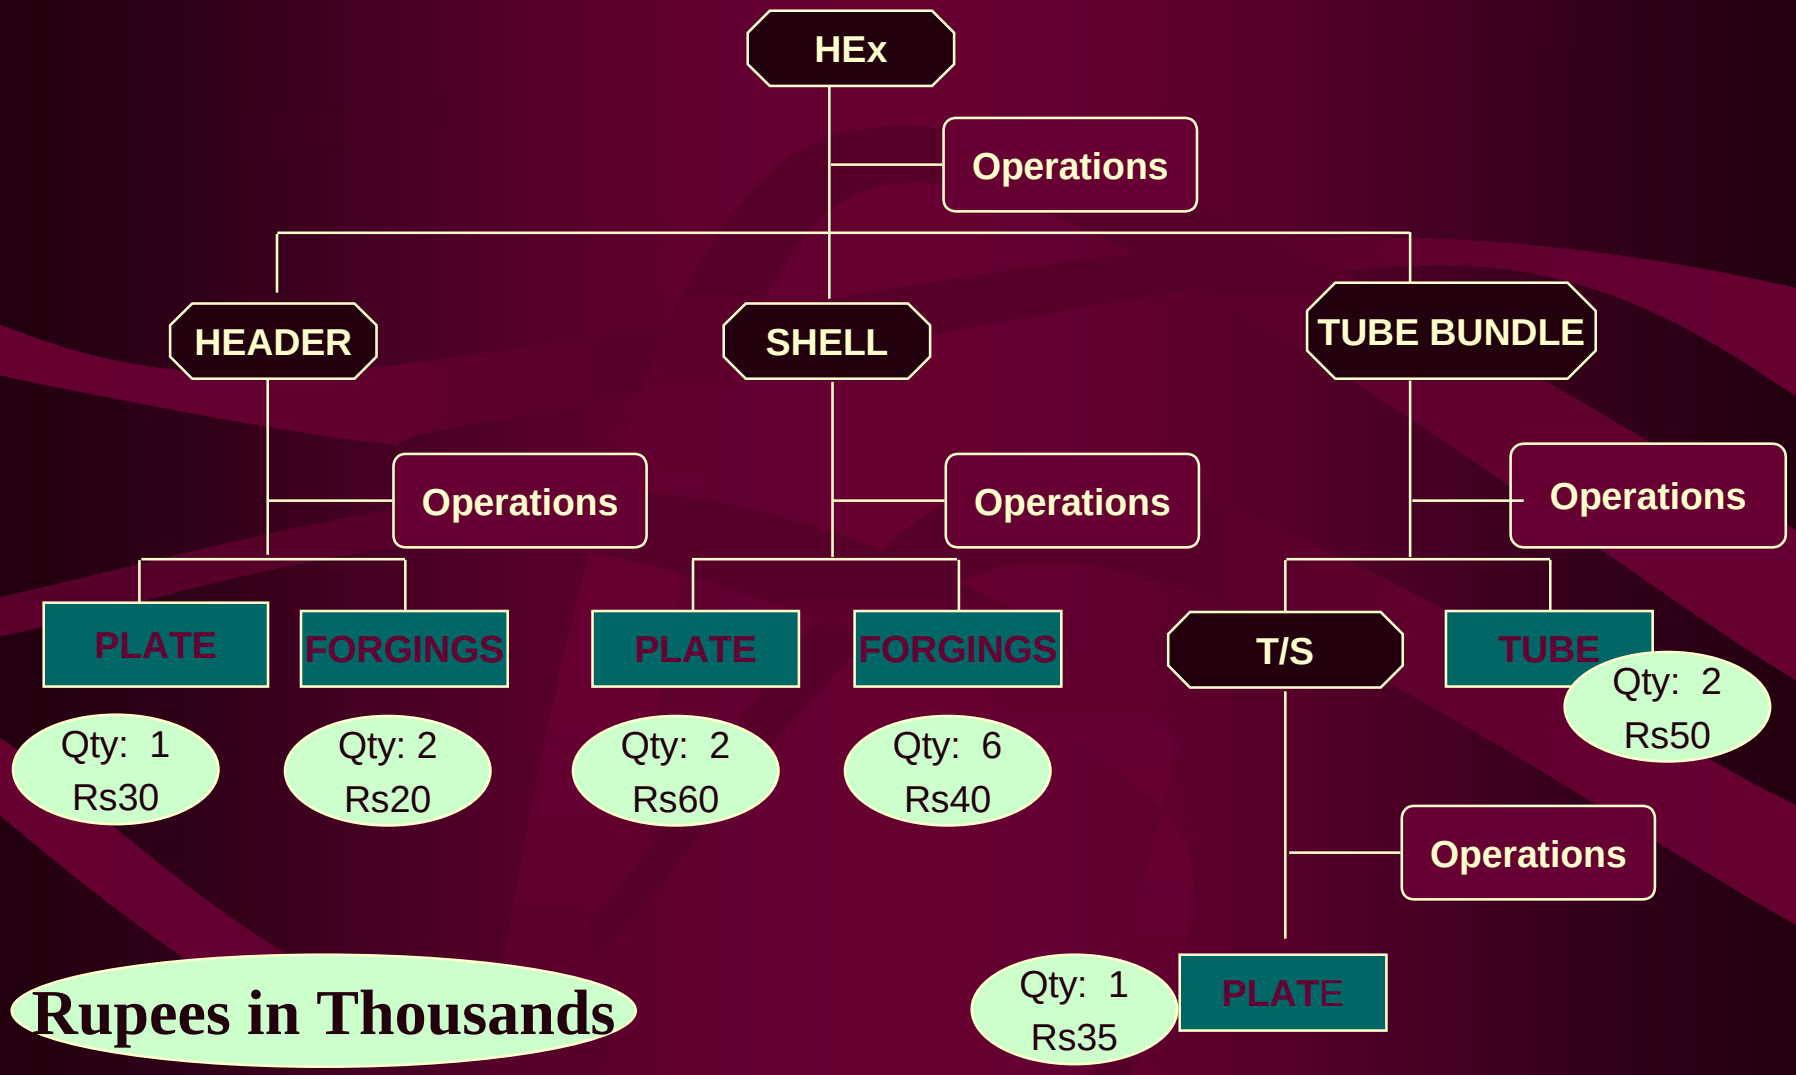
Product Structure



Production order is an order to manufacture an item or assembly

Gr. II (UE)

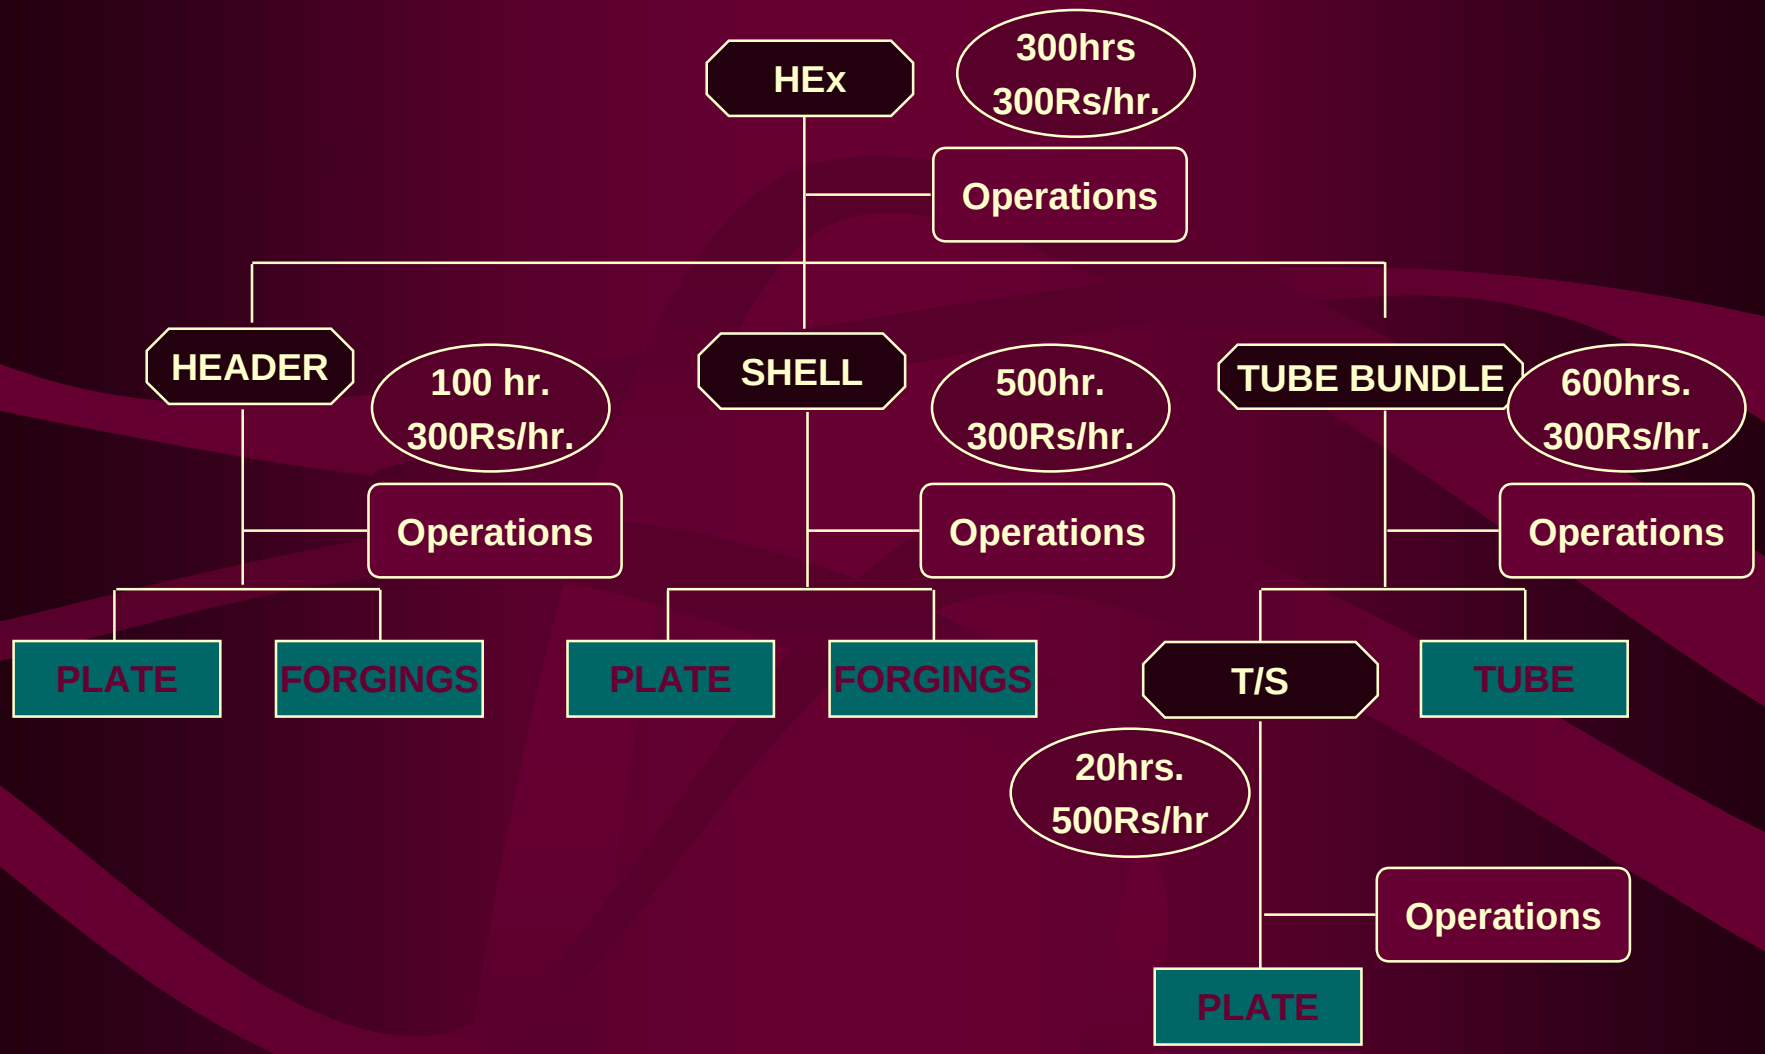
Material Costs



Rupees in Thousands

Gr. II (UE)

Operation Costs



Gr. II (UE)

Cost Price Components

Cost Price components (CPC) are the elements that make up the Cost Price. Each CPC will have a cost type (material, Operation, general costs, etc.) attached to it.

Cost Types

Material Costs

e.g. Plates, Pipes, Tubes

Surch. on Mat. Costs

Material Handling costs

Operation Costs

Fabrication, Machining

Surch. on Opr. Costs

Overheads for Fabrication, Machining

General Costs

Testing charges, Site expense, Transportation.

Cost Price Components

Gr. II (UE)

Cost Price Components are used for breaking down of cost for further analysis.

Examples of Cost Price Components

Code	Description	Type
CPL	CS Plates	Material
FRG	Forgings	Material
201	Machining	Operations
203	Man Hours	Operations
301	Material Overheads	Surcharge
302	Fabrication O/H	Surcharge

Gr. II (UE)

Operation Rate

- An operation rate is defined for each operation code. This operation code is linked to a work centre.
- For each operation code, define
  - Machine, Labour and Overhead rates
  - Overhead based on man/machine hours

Gr. II (UE)

Surcharges

Basis for extra costs
(in terms of percentages or amounts)

- Fixed Amount e.g Normal stress relieving, shrink fitting etc.
- Percentage of
  - Selective Costs e.g Material OH only on material Costs.
  - Total costs e.g D&E applied on total cost.

Gr. II (UE)

Material Costs

- **Material Costs:**
  - **Standard items at average price at issue**
  - **Customised items at actual costs at receipt**
- **Material overhead cost will have following cost components:**
  - **Overhead rate**
  - **Inventory carrying charges**
  - **Interest on FA**

Operation Costs

- **Operation Costs:**
  Hours Accounting (labour, Machine)
- **Operation rates will have following Cost components :**
  Basic labour / machine rate
  Relatable overhead
  Non Relatable overhead } as surcharge
  Interest on Fixed Assets }

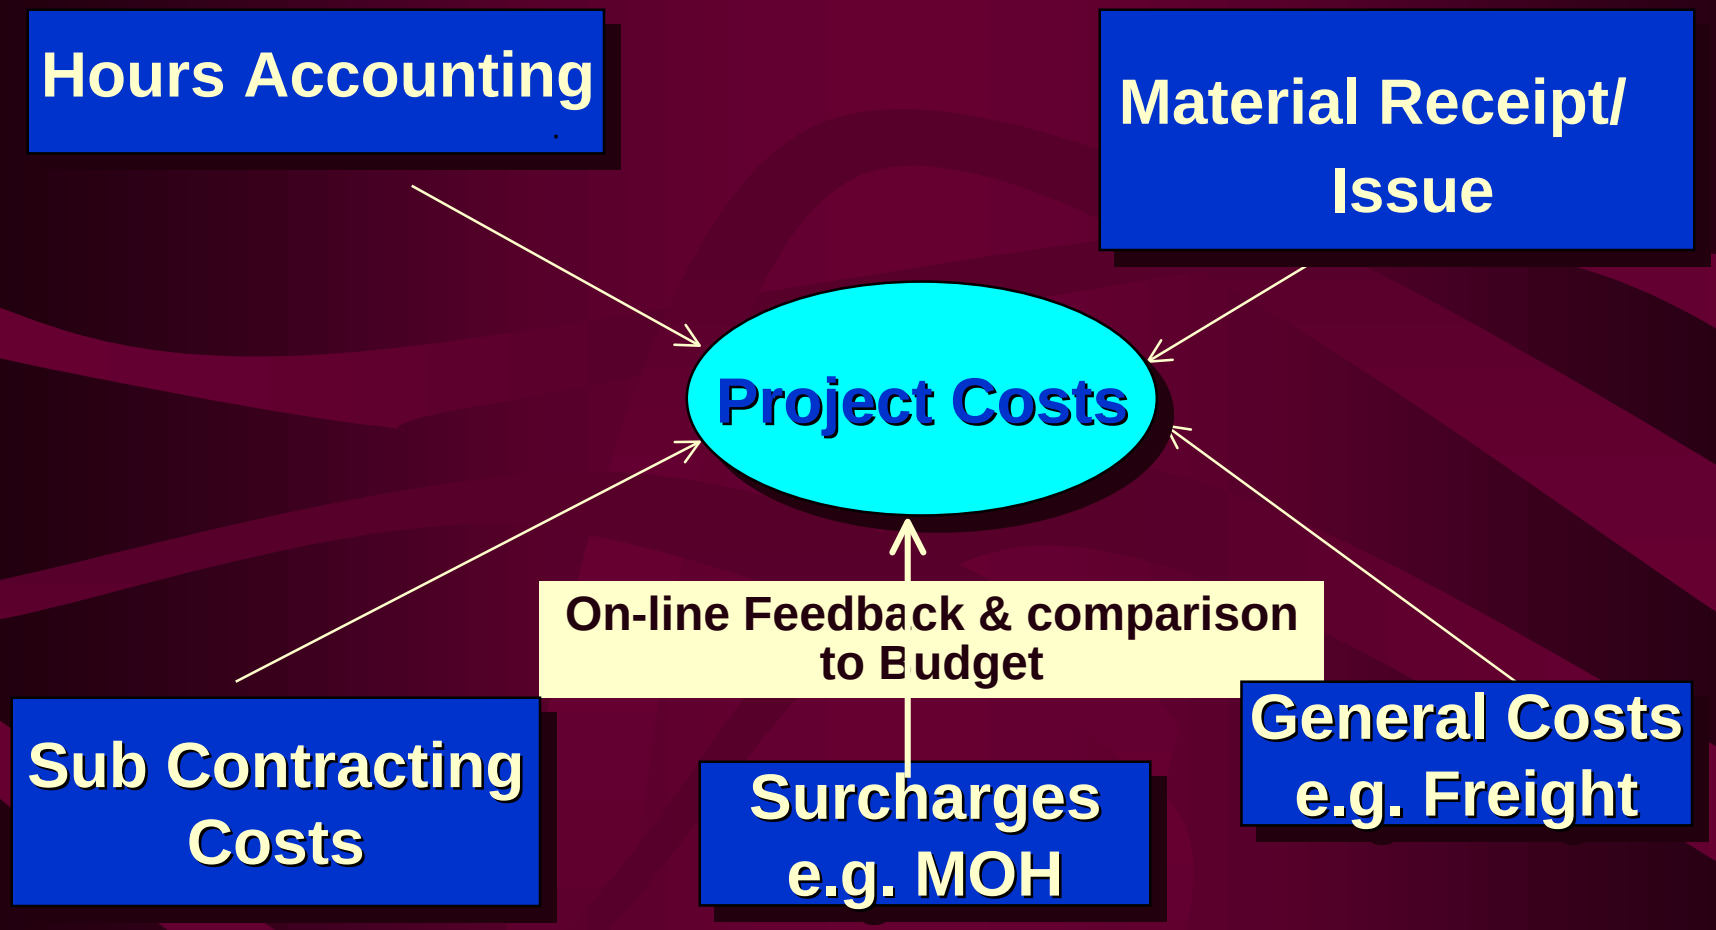
General Costs

- **General Costs:**
  - **Standard rates e.g Testing charges.**
  - **Direct Expenses e.g. Dredging, transport etc.**
- **For Standard rates, the Cost components will be:**

Basic value
Relatable overhead }
Non Relatable overhead } - as surcharge
Interest on Fixed Assets }

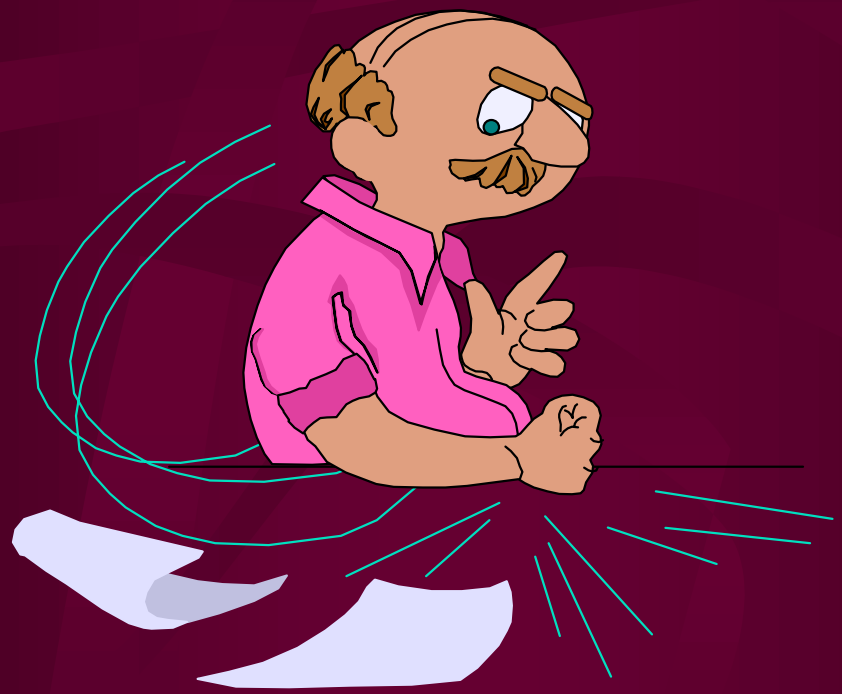
Gr. II (UE)

Job Costs



Gr. II (UE)

Cost Allocation



Gr. II (UE)

Cost Allocation

Key Functionality

- Allocation on Dimension Level
- Activities: additional Dimension
- Cost Drivers based on Logistic Data for ABC (Activity Based Costing)

not planned to be implemented initially.

Cost Driver examples include no. of purchase orders / order lines, Items Purchased / sold, BOM lines routing Lines etc.

Gr. II (UE)
