1. Purchase Order Creation

NAVIGATION PATH
Procurement → Purchase Orders → Purchase Orders

This session is used to view, enter and maintain Purchase Order Headers. The Purchase Orders session (tdpur4100m900) is the starting point for all procurement activities in Infor LN / Baan.

Creating a New Purchase Order

Follow these steps to create a new Purchase Order:

1	Navigate to the Purchase Orders session via the menu path above.
2	Click on the New button. The Purchase Order Session (tdpur4100m900) will open.
3	Select the Business Partner (supplier) from whom you need to procure goods or services.
4	Select the Order Type — this determines which activities will be required for the order.
5	Select the Purchase Office responsible for managing this order.
6	Save the record. The system will automatically generate a unique Purchase Order number.

Key Fields on the Purchase Order Header

Field	Description
Business Partner	The supplier from whom you are purchasing goods or services (Buy-from partner).
Order Type	Determines which activities and procedures are required. Configured at the Purchase Order Type level.
Purchase Office	The organizational unit responsible for managing this purchase order.
Order Number	Automatically generated by the system when the record is saved.
Status	Tracks the current state of the order: Created → Approved → In Process → Closed.
Currency	The currency in which the order is placed, defaulted from the business partner.
